INTRODUCTION

The *Mastercam 2020 for SOLIDWORKS® Administrator Guide* covers the installation, updating, and administration of Mastercam for SOLIDWORKS's licenses and products. Mastercam for SOLIDWORKS is a protected software and requires a license to run.

Before You Begin

Mastercam 2020 for SOLIDWORKS uses one of three license types to run: HASP, NetHASP, or software. HASPs and NetHASPs are hardware licenses, meaning they are licenses stored in a physical USB plug-in device. The software license is digital and is managed by CodeMeter. These licenses are either Retail or Evaluation. Before continuing, be aware of your current license type.

This guide also refers to Mastercam for SOLIDWORKS's various folder locations. Mastercam for SOLIDWORKS creates folders that are non-modifiable and user-modifiable. The default folder locations and types are listed below.

Mastercam for SOLIDWORKS Installation Locations

Program Files (Non-modifiable)

C:\Program Files\Mastercam 2020\Mastercam for SOLIDWORKS

C:\Program Files\Common Files\Mastercam

Documents (User-modifiable)

C:\Users\\Documents\My Mastercam 2020

C:\Users\Public\Documents\Shared Mastercam

Mastercam for SOLIDWORKS Resources

Enhance your Mastercam for SOLIDWORKS experience by using the following resources:

- *Mastercam for SOLIDWORKS Documentation*—Mastercam for SOLIDWORKS installs a number of helpful documents for your version of software in the Documentation folder of your Mastercam 2020 for SOLIDWORKS installation.
- *Mastercam for SOLIDWORKS Help*—Access Mastercam for SOLIDWORKS Help by selecting **Mastercam2020, Contents**, from the SOLIDWORKS Help menu or by clicking **Help Topics** in the Mastercam Info Center on the SOLIDWORKS Task Pane.
- *Mastercam for SOLIDWORKS Reseller*—Your local Mastercam Reseller can help with most questions about Mastercam for SOLIDWORKS.
- *Technical Support*—Our Technical Support department (+1 860-875-5006 or support@mastercam.com) is open Monday through Friday from 8:00 a.m. to 5:30 p.m. USA Eastern Standard Time.
- *Mastercam Tutorials*—We offer a series of tutorials to help registered users become familiar with basic Mastercam features and functions. Visit our website to see the latest publications.
- *Mastercam University*—Mastercam University, an affordable online learning platform, gives you 24/7 access to Mastercam training materials. Take advantage of more than 180 videos to master skills at your own pace and

help prepare for Mastercam Certification. For more information on Mastercam University, please contact your Authorized Mastercam Reseller, visit university.mastercam.com/, or email training@mastercam.com.

- *Online Communities*—You can find a wealth of information at www.mastercam.com.
 - Follow us on Facebook (www.facebook.com/Mastercam), Twitter (twitter.com/Mastercam), and Instagram (www.instagram.com/mastercamcadcam/) for the latest tech tips and Mastercam for SOLIDWORKS news.
 - See Mastercam for SOLIDWORKS in action on YouTube (www.youtube.com/user/MastercamCadCam).
 - For more information on CNC Software, Inc., to find and apply to jobs, and connect with people using Mastercam for SOLIDWORKS, visit us on LinkedIn (www.linkedin.com/company/cnc-software/).
 - Registered users can search for information or ask questions on the Mastercam Web forum, forum.mastercam.com, or use the Mastercam Knowledgebase at kb.mastercam.com.

Contact Us

For questions about this or other Mastercam for SOLIDWORKS documentation, contact the Technical Documentation department by email at techdocs@mastercam.com.

INSTALLING AND SETTING UP LICENSES

A license is required to run Mastercam 2020 for SOLIDWORKS. This license can be a hardware license, such as a HASP or a NetHASP, or a software license. Listed below are installation steps for each license type, how to set up servers, and how to monitor licenses.

Installing a Hardware License

Use the procedures below to install and setup your hardware license.

Installing a HASP

Mastercam for SOLIDWORKS uses HASPs for single-user hardware licensing. Follow the procedure below to install your HASP for a single user.

1. Locate an available USB port on the computer.
2. Plug the HASP into the port.

CAUTION

The HASP attaches to your port in only one orientation. Do not force it into the port as you may damage the port and the HASP.

Installing a NetHASP

Mastercam 2020 for SOLIDWORKS uses a NetHASP to service Mastercam for SOLIDWORKS installations from a central location. Because these licenses are served over a network, a firewalled server running a NetHASP must allow the license server to communicate through the firewall. This requires two configuration steps:

- The firewall must be configured to open port 475.
- The NetHASP server program (`C:\windows\syswow64\nhsrvce.exe`) must be allowed to work through the firewall.

Please consult your firewall documentation for instructions on how to change these settings.

NOTE

The NetHASP is followed by a number indicating the maximum number of simultaneous seats of each licensed product, such as NetHASP-20 or NetHASP-50. All product groups must be the same version.

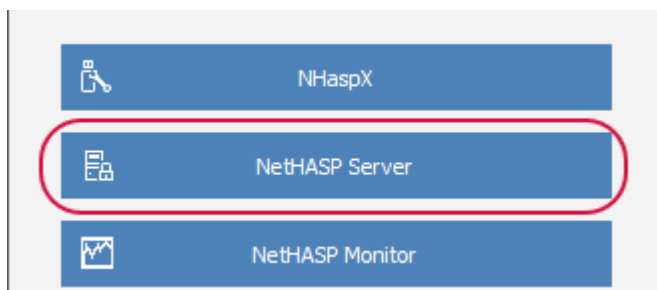

CAUTION

Keep the NetHASP in a physically safe place. All Mastercam for SOLIDWORKS users on the network are vulnerable to its loss.

Setting Up a NetHASP Server

To set up a NetHASP server, follow the procedure below.

1. Connect the NetHASP to a USB port on the computer you want to use as the NetHASP server.
2. Open the Mastercam 2020 for SOLIDWORKS installer.
3. In the Mastercam Installer, select **Utilities, NetHASP Server** and follow the instructions.

NOTE

If you installed Mastercam 2020 for SOLIDWORKS onto your current computer, then the NetHASP drivers have already been installed with Mastercam for SOLIDWORKS.

4. Select **Finish** to exit when the installation is complete.

NOTE

You can, but are not required to, install Mastercam for SOLIDWORKS products on the NetHASP server.

5. Use the NHasp utility to check available Mastercam for SOLIDWORKS licenses.

Setting Up Mastercam for SOLIDWORKS with a NetHASP

After setting up the NetHASP server, you will need to set up Mastercam 2020 for SOLIDWORKS to use it. Follow the procedure below.

NOTE

The following procedure is for client-side configuration.

1. Install Mastercam 2020 for SOLIDWORKS.
2. Install the TCP/IP network protocol, if it is not already installed.
3. Run **NHaspX.exe**. It is located in the Mastercam 2020 for SOLIDWORKS **Start** menu folder.
4. Set **Mode** to **Network**.

5. From the Mastercam for SOLIDWORKS's installation's `support` folder, copy the `nethasp.ini` file to your desktop.

6. Use your preferred text editor to edit the `nethasp.ini` file for the appropriate network protocol and identify the computers that are being used as the NetHASP server.
7. Copy the edited `nethasp.ini` file to the main Mastercam for SOLIDWORKS directory. By default, this directory is `C:\Program Files\Mastercam 2020\Mastercam for SOLIDWORKS`.

NOTE

Configuring the `nethasp.ini` file to look for the NetHASP server at a specific address improves the time it takes a computer to find the server on the network. By omitting this step, when Mastercam 2020 for SOLIDWORKS launches and checks for network licenses, it takes extra time to search all computers on the network to find the NetHASP server. If all licenses have been checked out by other Mastercam 2020 for SOLIDWORKS users on your network, the search might take an especially long time

8. When you launch Mastercam 2020 for SOLIDWORKS, it looks at the specified address.

Installing a Software License

Use the procedures below to install and setup your software license. If Mastercam for SOLIDWORKS is not installed, you can download CodeMeter and the Mastercam Activation Wizard from the Mastercam website (www.mastercam.com/Support-Downloads-Drivers-and-Applets).

Activating Your License

To activate your license, select **Start, Mastercam Licensing Utilities, Activation Wizard** (Windows 10) or **Start, All Programs, Mastercam Licensing Utilities, Activation Wizard** (Windows 7 or 8). Then follow the instructions.

Select the **Help** button in the Activation Wizard for a specific procedure on activating a license.

Enabling the CodeMeter Server

To enable the CodeMeter server, do the following.

1. Select **Start, CodeMeter, CodeMeter Control Center** (Windows 10) or **Start, All Programs, CodeMeter, CodeMeter Control Center** (Windows 7 or 8).

The **CodeMeter Control Center** dialog box displays.

2. In the **CodeMeter Control Center** dialog box, select **WebAdmin**.

Your default browser then displays the CodeMeter WebAdmin website.

3. Select **Configuration, Server**.

4. Set **Network Server** to **Enable**. Then click **Apply**.

This will broadcast the software license over the network.

NOTE

Network Port must be set to 22350.

5. Make note of the IP address of the server. You will need this if the user computer has difficulty contacting the server.

Setting the User Connections

Once the license has been activated on the server, Mastercam for SOLIDWORKS users should be able to install and run Mastercam for SOLIDWORKS. Occasionally some users may have difficulty finding the server. The following procedure directs a client to the server.

1. Select **Start, CodeMeter, CodeMeter Control Center** (Windows 10) or **Start, All Programs, CodeMeter, CodeMeter Control Center** (Windows 7 or 8).

The **CodeMeter Control Center** dialog box displays.

2. In the **CodeMeter Control Center** dialog box, select **WebAdmin**.

Your default browser then displays the CodeMeter WebAdmin website.

3. Select **Configuration**.

4. Select **Add new server**.
5. Enter the Server IP address of the PC or server that is hosting the network license, and then click **OK**.
6. Click **Apply**, and close the CodeMeter WebAdmin website.

The user PC can now run Mastercam for SOLIDWORKS.

License Monitoring

If you have a NetHASP or software license, you can monitor license activity. Monitoring a license allows you to see :

- Which products are licensed
- The number of active users
- The maximum number of users
- The number of available licenses for each product

NetHASP Monitoring

NetHASPs allow you to monitor licenses through either the NHaspx utility or the Aladdin Monitor.

NHaspx Utility

You can monitor NetHASP activity using the NHaspx utility. Select the **Active licenses** button to monitor the activities listed in the previous section. **Mode** must be set to **Network** in the **NHaspx** dialog box to enable the **Active licenses** button.

The NHaspx utility does not report the licenses that are checked out on the computer on which it is running. Also, it may run slowly if the `nethasp.ini` file is not present or is set up incorrectly.

Aladdin Monitor

Besides using the NHaspx utility, you can use the Aladdin Monitor utility to view a list of users logged in to the NetHASP server. To install the Aladdin Monitor, run the Mastercam for SOLIDWORKS installation program from the Mastercam 2020 for SOLIDWORKS installation media, choose **Utilities**, and then **NetHASP Monitor**, and follow the instructions.

Aladdin Monitor is a third-party application for monitoring NetHASP usage and is included with Mastercam for SOLIDWORKS for your convenience. However, CNC Software, Inc. can provide only limited support for this application. Contact Gemalto (www.gemalto.com) for technical support issues.

The procedure below is a basic workflow of using the Aladdin Monitor.

1. Run the Aladdin Monitor by selecting **AKS Monitor** from the **Aladdin** folder in the **Start** menu.
2. In the left window pane, select the NetHASP to monitor.
3. The right window pane then updates with that NetHASP's information.

After you select a NetHASP, the **Program table** lists the following information:

- Mastercam products in use (Program number).
- Number of users currently using each product.
- Maximum users allowed for each product.
- Remaining product activations.

Program No	Current Stations	Maximum Stations	Activations Left
1	3	10	Unlimited
5	1	10	Unlimited

Refer to the following table for program numbers and their equivalent Mastercam products.

Program Number	Mastercam Product	Program Number	Mastercam Product	Program Number	Mastercam Product
1	[NHaspX tech info]	13	Router	42	CATIA V4 Read/Write
2	Mill Entry	14	Router 3D	43	Unigraphics Read
3	Mill	17	Art	44	Swarf 5-axis
4	Mill	19	Multiaxis	46	Mastercam for SOLIDWORKS 2D
5	Mill 3D	24	CoroPlus	48	Mastercam for SOLIDWORKS 3D
6	Lathe Entry	28	ProDrill	49	Port Expert
7	Lathe	29	STEP Read	50	Blade Expert
8	Wire	31	Engraving	52	Mastercam for SOLIDWORKS Lathe
9	Design	32	Curve 5-axis/Drill 5-axis	53	Probing
10	Solids	37	ProE/Creo Read	56	CATIA V5 with PMI
11	Router Entry	40	CATIA V5 Read	57	Mori APT/CL Post
12	Router	41	CATIA V5 Write	60	Mill-Turn

The **Login table** box displays details for the selected product. This information includes:

- User login ID (IP address)
- User host name

- Network protocol being used
- Period of inactivity required before the product entry is deleted.

Login table for program # 1

No	Login ID	Host Name	Protocol	Timeout
1	172.16.721.21		UDP	897254

Software License Monitoring

You can use CodeMeter to monitor active software licenses. You can, but are not required to, install Mastercam for SOLIDWORKS products on your server. However, to act as a server, the host computer must have an active CodeMeter license. The applications to activate the license and run the CodeMeter software are installed by default when you install Mastercam for SOLIDWORKS.

If Mastercam for SOLIDWORKS is not installed, you can download CodeMeter and the Mastercam for SOLIDWORKS Activation Wizard from the Mastercam website (www.mastercam.com/Support-Downloads-Drivers-and-Applets).

Once your server and users have been setup, you can use the CodeMeter Web Admin (accessed from the **CodeMeter Control Center** dialog box by selecting **WebAdmin**) to monitor software licenses. Follow the procedure below to go to the license monitoring page of CodeMeter.

1. Select **Start, CodeMeter, CodeMeter Control Center** (Windows 10) or **Start, All Programs, CodeMeter, CodeMeter Control Center** (Windows 7 or 8).

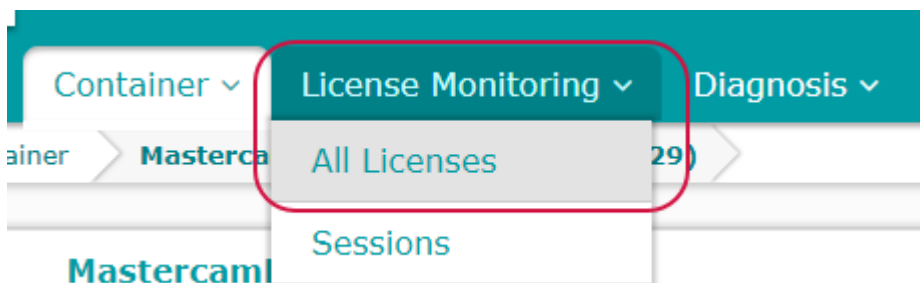

The **CodeMeter Control Center** dialog box displays.

2. In the **CodeMeter Control Center** dialog box, select **WebAdmin**.

Your default browser then displays the CodeMeter WebAdmin website.

3. If you are not on the server hosting the license, select the **Current Server** button located at the bottom of the WebAdmin page. Select the server you wish to monitor and click **Apply**.
4. Select **Licensing Monitoring, All Licenses**.

5. To view more details about which user has each license checked out, select the **Product Code** number for the license you wish to view more information about.

CodeMeter allows for the simultaneous use of up to 500 seats of each licensed product. If the number of seats in your network exceeds this amount, you must set up an additional server on another workstation.

UPDATING MASTERCAM FOR SOLIDWORKS PRODUCTS AND LICENSES

Use the procedures below to update the Mastercam for SOLIDWORKS product or a Mastercam for SOLIDWORKS license.

Updating a License

Use the procedures below to update your hardware or software licenses.

Updating Hardware Licenses

You must update your Mastercam for SOLIDWORKS licensing hardware (HASP or NetHASP) with an update code obtained from your Reseller or CNC Software, Inc. Customer Service. This needs to be done when you install or upgrade to a new release of Mastercam for SOLIDWORKS, and if you are not on Mastercam for SOLIDWORKS Maintenance.

The update code is a file delivered to you by one of these methods:

- Included in your Mastercam 2020 for SOLIDWORKS software kit.
- Mailed on electronic media.
- Emailed as a file attachment.

Contact your local Mastercam for SOLIDWORKS Reseller if you cannot locate your update code.

If you received your update code via email, save the file attachment to an accessible location. Do not change the file extension. If you received your updated code via post or as part of an installation kit, insert the received media in the appropriate drive to access the file.

Update codes have a file extension that indicates the type of license they update. The Mastercam for SOLIDWORKS installation program associates these file extensions with the program that you use to update the SIM codes.

File Extension	License Type	Update Program
*.HCODE	HASP	HaspX.exe
*.NHCODE	NetHASP	NHaspX.exe

Updating a HASP

You can enter a HASP code automatically by double-clicking the update code file (*.HCODE). To update the code manually for both the update code file and the update code string, do the following.

CAUTION

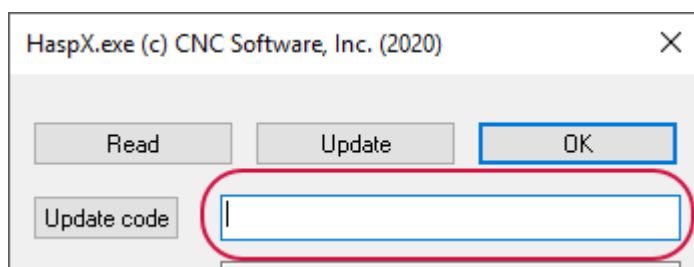

Before updating, you must have Mastercam for SOLIDWORKS installed. You must complete the following procedure on the computer to which the HASP is attached. Updates over a remote connection will fail.

1. Choose one of the following methods to run **HaspX.exe**.
 - a. (Windows 7 and 8) Select **Start, All Programs, Mastercam 2020 for SOLIDWORKS, Utilities, Hasp X**.
 - b. (Windows 10) Select **Start, Mastercam 2020 for SOLIDWORKS, Hasp X**.
 - c. Use Windows Explorer to navigate to the Mastercam 2020 for SOLIDWORKS installation location, and double-click **HaspX.exe**.
 - d. If Mastercam for SOLIDWORKS is not installed on the server, run the Mastercam Installer. Select **Utilities, NHaspX** or you can download NHaspX from the Mastercam for SOLIDWORKS website (www.mastercam.com/Support-Downloads-Drivers-and-Applets).
2. Depending on what type of update code that you received, follow one of the steps below:
 - a. If you received a *.HCODE file to update your HASP, select **Update code**. Navigate and open the .HCODE file.

The HaspX utility extracts the update code from the file.

- b. If you received the update code as a string of numbers, enter the code into the text box indicated below. The code must be entered in exactly as it was received, including spaces and dashes.

3. Select **Update**. HaspX updates the license and displays the products (including any newly activated products) that the license supports.

Start date:	09/21/2018
End date:	06/30/2019
Maintenance Expiration date:	None (Reseller)
HASP found	

4. Once you update the license, the **HaspX** dialog box displays important license information at the bottom of the dialog box.

Start date: 06/11/2018

End date: 06/30/2019

Maintenance Expiration date: None (Reseller SIM)

HASP successfully updated

5. Click **OK** to exit the **HaspX** dialog box.

Updating a NetHASP

You can enter a NetHASP code automatically by double-clicking the update code file (* .NHCODE). To update the code manually, do the following.

CAUTION

This update must be done only on the computer on which the NetHASP is attached. This process cannot be completed over a remote connection.

1. Choose one of the following methods to run **NHaspX.exe**.
 - a. (Windows 7 and 8) Select **Start, All Programs, Mastercam 2020 for SOLIDWORKS, Utilities, NHaspX**.
 - b. (Windows 10) Select **Start, Mastercam 2020 for SOLIDWORKS, NHaspX**.
 - c. Use Windows Explorer to navigate to the Mastercam 2020 for SOLIDWORKS installation location, and double-click **NHaspX.exe**.
2. In the **NHaspX** dialog box, ensure that **Mode** is set to **Local**.

NhaspX.exe (c) CNC Software, Inc. (2020)

Mode: ☒ Local ☐ Network

NHaspX analyzes the license and displays the serial number and current Mastercam for SOLIDWORKS products.

3. Verify that the displayed **Serial number** matches the serial number provided with your Mastercam 2020 for SOLIDWORKS software kit.

10 CoroPlus®
10 ProDrill
10 Engraving
10 Curve5ax/Drill5ax
10 Creo Read
10 Rast2vec
10 UG/NX
10 Swarf
10 Port Expert
10 NetHASP 10

User type: Reseller

Serial number: [Red Circle]

Start date: 07/02/2018

End date: 06/30/2019

Maintenance expiration date: None (Reseller)

NetHASP 10 found on the network

NOTE

Keep a record of the serial number in the event that you need to contact Technical Support at CNC Software, Inc. or your Reseller.

4. Select **Update code file**. The **Select an Update Code file** dialog box displays.
5. Select an update code file (* .NHCode), and click **Open**.
6. In the **NHaspX** dialog box, select **Update**. NHaspX updates the SIM and displays the products for which the SIM has been activated.
7. Change the **Mode** back to **Network**.
8. Select **OK** to exit the **NHaspX** dialog box.

Updating a Software License

As with hardware licenses, when you install or upgrade to a new release of Mastercam for SOLIDWORKS, you must update your Mastercam for SOLIDWORKS licensing software with an update code.

If the software license is being updated on the same computer it is currently on, you do not need to deactivate and reactivate it. However, if you plan to move the location of the software license to another computer or network, you must deactivate it and then reactivate on the new location before updating.

To deactivate your license, select **Start, Mastercam Licensing Utilities, Activation Wizard** (Windows 10) or **Start, All Programs, Mastercam Licensing Utilities, Activation Wizard** (Windows 7 or 8). Then follow the instructions.

If Mastercam for SOLIDWORKS is not installed, you can download CodeMeter and the Mastercam Activation Wizard from the Mastercam website (www.mastercam.com/Support-Downloads-Drivers-and-Applets).

For more information on how to deactivate and activate licenses, refer to the Help in the Activation Wizard.

Updating Mastercam for SOLIDWORKS

Use the procedures below to update Mastercam for SOLIDWORKS to the latest version.

CAUTION

The following instructions apply only to English-based Mastercam for SOLIDWORKS installations with

updates received from CNC Software, Inc. For more information on downloading non-English Mastercam for SOLIDWORKS updates from other locations, contact your local Mastercam for SOLIDWORKS Reseller.

A maintenance upgrade is an executable file that you run to update your installation. Before you do an update, you must exit Mastercam for SOLIDWORKS. If you start an update with Mastercam for SOLIDWORKS open, you are asked to close all sessions running Mastercam for SOLIDWORKS on the computer before continuing with the update installation.

1. Download the latest update from the Mastercam for SOLIDWORKS website (www.mastercam.com/Support/Downloads), or get the update from your local Mastercam for SOLIDWORKS Reseller.
2. Copy the downloaded file to the computer on which you want to update.
3. If Mastercam for SOLIDWORKS is running, close it.
4. Double-click the update file, and follow the instructions.
5. When the installation is complete, click **Finish**.

You can also update Mastercam for SOLIDWORKS with the Automatic Update Service (AUS).

1. Open SOLIDWORKS and start Mastercam 2020 for SOLIDWORKS.
2. Select **Help, Mastercam2020, Updates**. The **Mastercam for SOLIDWORKS Updates** dialog box displays.

NOTE

Your computer must be connected to the Internet to check for updates.

3. The dialog box will display the date of the most recent check for updates. Select or deselect the checkboxes to **Automatically check for updates** or to **Show new update alerts**.
4. Click **Check Now**.
5. Follow the prompts to install the update.

LAUNCHING MASTERCAM FOR SOLIDWORKS

Mastercam for SOLIDWORKS determines the initial license type automatically when it starts. However, there are other ways to force Mastercam for SOLIDWORKS to always start with a specific license type.

On start up, Mastercam for SOLIDWORKS attempts to connect to a HASP, which is the default license type for Mastercam 2020 for SOLIDWORKS. Mastercam for SOLIDWORKS searches for the licenses in the following order:

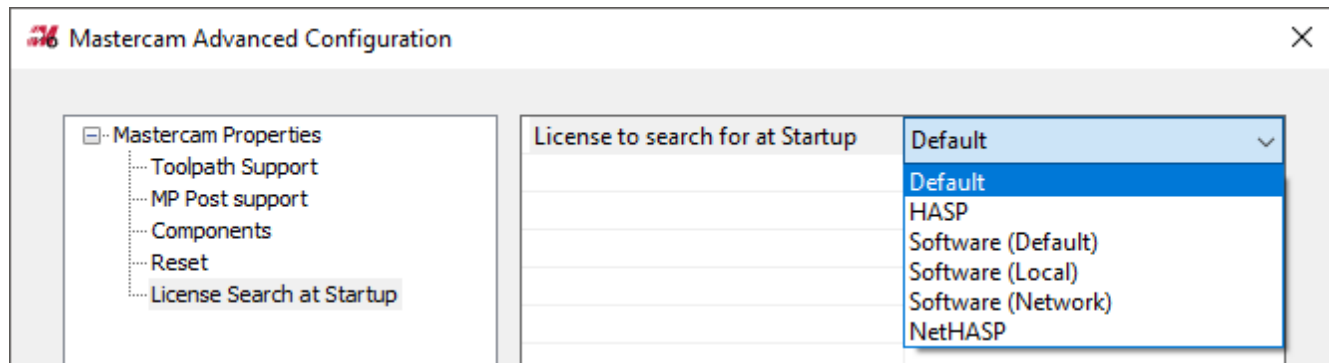

- HASP
- Software (local)
- Software (network)
- NetHASP

If you do not have any of the above licenses currently activated, you will then be asked if you have an activation code. If you select **Yes**, the Activation Wizard opens. If you select **No**, Mastercam for SOLIDWORKS closes and no further action takes place.

Setting the Start up License

You can override the default license search protocol using the **Mastercam Advanced Configuration** dialog box, located in the Mastercam for SOLIDWORKS Start menu folder.

In the **Mastercam Advanced Configuration** dialog box, select the **License Search at Startup** page. Then select one of the following options. Mastercam for SOLIDWORKS will then search for that license type only.

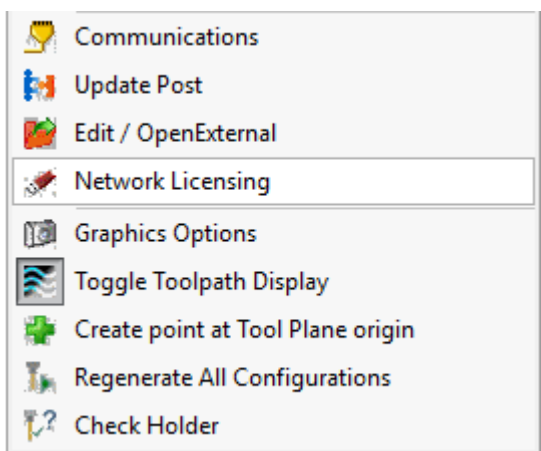

Checking Out a Product Level

NOTE

This section only applies to users with a NetHASP license.

By default, Mastercam for SOLIDWORKS uses the settings in the **System Configuration** dialog box to determine whether the start up product is Mill, Lathe, or Router. It then loads the highest level for that product. You can use the **Network Licensing** dialog box to override this behavior and specify a different default product level upon starting Mastercam for SOLIDWORKS.

1. On the **Mastercam2020** tab, select **Toolpath Utilities, Network Licensing**.

The **Network Licensing** dialog box displays.

2. From the **Product level** drop-down, select the desired product level.
3. Select **Save as default product level for next startup**.

NOTE

To change products only for the current session, deselect this option.

4. Click **OK** to exit the dialog box.

CUSTOMIZING YOUR MASTERCAM FOR SOLIDWORKS INSTALLATION

If you are setting up Mastercam for SOLIDWORKS to install on multiple computers, or would like to have all user installations use the same files, use the sections below to customize your installations.

NOTE

Mastercam 2020 for SOLIDWORKS cannot be installed on a drive created with the SUBST command. Use the actual path to the desired installation folder, not the substituted drive letter.

CAUTION

Changing any of the files below will affect your Mastercam for SOLIDWORKS installation. It is recommended that you do not modify these files unless you have experience with making the necessary modifications.

Setting Registry Options

To run Mastercam 2020 for SOLIDWORKS, you need permission to read from the following registry key. This key is created when Mastercam 2020 for SOLIDWORKS first launches and stores user-specific settings.

```
HKEY_LOCAL_MACHINE\SOFTWARE\CNC Software, Inc.\
```

You also need to have read and write permission for this registry key. This key is created when Mastercam 2020 for SOLIDWORKS first starts and is used to store per-user settings.

```
HKEY_CURRENT_USER\SOFTWARE\CNC Software, Inc.\
```

Registry permissions are the Windows defaults, so no adjustment should be needed in a default Windows installation.

Setting Group Policies

Setting group policies can severely restrict permissions on Windows systems. These registry permissions are the windows defaults, so no adjustment should be needed in a default Windows user configuration.

Most other group policies have no effect on Mastercam for SOLIDWORKS's ability to run. However, a combination of group policies may cause issues with Mastercam 2020 for SOLIDWORKS.

Setting Installation Defaults

You can set installation defaults in the `mcim.ini` file, which is included in the `\support` folder in the installation media. The `mcim.ini` file is text that contains the defaults for the following installation settings:

- Installation language
- Program language
- Units

- Installation type
- Destination directory

To set these defaults, follow the procedure below.

1. Copy the contents of the installation media to a local or network drive.
2. Open `mcim.ini` in your preferred text editor. Do not use a word processor to open this file.
3. To disable a setting, comment it out by inserting `;;` before the first character of the line.
4. Save the file.

NOTE

You must run modified installations from the saved location.

IF YOU NEED MORE HELP

For assistance with installing Mastercam 2020 for SOLIDWORKS, licensing, or to obtain more information on using Mastercam 2020 for SOLIDWORKS, contact your local Mastercam for SOLIDWORKS Reseller. If your Mastercam for SOLIDWORKS Reseller is unavailable, you can call CNC Technical Support. When calling CNC Software, Inc. for technical support, please follow these guidelines:

- Be sure you have already tried to contact your Mastercam for SOLIDWORKS Reseller.
- Provide the serial number of your HASP, NetHASP, or software license.
- Be ready to describe the problem in detail. Write down what happened, particularly if you cannot call immediately after the problem occurs.
- Be in front of your computer when you call.
- If possible, try to duplicate the problem before calling. Our Support Services technician may require you to duplicate the problem while you are on the phone.
- When you call, have ready a complete description of your hardware, including your operating system (OS), central processing unit (CPU), graphics card and settings, and memory.

You can also leave a message twenty-four hours a day, seven days a week via our email or website addresses. When sending email, please include:

- The serial number of your HASP, NetHASP, or software license
- Telephone number and contact information where you can be reached
- Files required to reproduce an issue

Use Mastercam for SOLIDWORKS's Zip2Go utility to gather and compress open part data into a ZIP file. This utility makes it easy to provide your Mastercam Reseller or CNC Software, Inc. with a file attachment that contains the information they need. Zip2Go scans the machine groups in your current file and captures information such as your machine groups, configuration files, post files, tool and material libraries and toolpath files. For more information on using Zip2Go, please refer to the Mastercam for SOLIDWORKS Help.

Important Contact Information

Troubleshooting

Listed below are common issues that may occur after installing Mastercam for SOLIDWORKS or a Mastercam for SOLIDWORKS license. For more specific Mastercam for SOLIDWORKS issues, refer to the Mastercam KnowledgeBase (<https://kb.mastercam.com/>).

Repairing an Installation

If you encounter a problem after installation and no problems were detected with your license, you may need to repair your Mastercam 2020 for SOLIDWORKS installation.

1. Launch the Mastercam for SOLIDWORKS installation from the USB drive or from the Mastercam website download.
2. Select **Repair**, and follow the instructions.

Reinstalling NetHASP/HASP Drivers

Mastercam 2020 for SOLIDWORKS automatically installs NetHASP and HASP drivers. If the installation procedure was not completed, or if the drivers were removed Mastercam for SOLIDWORKS cannot recognize the NetHASP or HASP.

For HASP drivers, select **Hasp Setup** from the Mastercam 2020 for SOLIDWORKS **Start** menu folder, and then follow the onscreen instructions.

For NetHASP drivers, run **haspdinst.exe** from the Mastercam \common folder directory (for example, C:\Program Files\Mastercam 2020\Mastercam for SOLIDWORKS\common), and then follow the onscreen instructions.

Common Error Messages

Listed below are common error messages that display when attempting to start Mastercam for SOLIDWORKS or activate a license.

All available licenses are in use.

The maximum allowable number of users have checked out the product.

Requested Product Code is not available / Error checking out a *product name* license. No licenses have been purchased for this product.

Contact your local Mastercam for SOLIDWORKS Reseller.

Active NetHASP server not found.

The NetHASP license manager is not running. Check the NetHASP server and restart as necessary.

Authorization period on the license has expired.

An expired temporary license is being used to run Mastercam for SOLIDWORKS. A new code with a extended or permanent end date is required to launch the software.

The SIM has become disconnected. Mastercam for SOLIDWORKS will automatically shut down. You will get one chance to save your file.

Approximately once every two to 10 minutes, Mastercam for SOLIDWORKS verifies that the NetHASP server is still running and that the NetHASP is attached to the server. If this test fails, for example, due to a power loss or server failure, this error message displays on all computers running Mastercam for SOLIDWORKS.

You must save your work quickly and shut down Mastercam for SOLIDWORKS. Check the NetHASP connection and reconnect as necessary.

The Mastercam for SOLIDWORKS version you have attempted to run is not supported by your Maintenance contract. Please contact your local Mastercam for SOLIDWORKS Reseller for assistance.

The maintenance date of the license being used is not valid for the version of Mastercam for SOLIDWORKS that is attempting to open. If your maintenance is still valid, you will need to get a copy of your updated license from your Reseller. If you are no longer on maintenance, you will need to renew your contract to run this release of the software.

No Server found which has allowed access to this computer.

The workstation is not authorized to access the license server. Open the CodeMeter Control Center from the **Start** menu (under the **CodeMeter** folder).

Network communication error.

The software license is no longer communicating with the server. Save your work quickly and shut down Mastercam for SOLIDWORKS. Open the CodeMeter Control Center and click the **WebAdmin** button to troubleshoot.

SIM Not Found

Mastercam for SOLIDWORKS could not find your license. Try the following suggestions:

- Remove and reconnect the HASP or NetHASP.
- Try installing the HASP or NetHASP in a different port.
- Check that the light at the end of the HASP or NetHASP is on. If it is not on, the HASP or NetHASP is either broken or not receiving power from the SUB port.
- Reinstall the HASP drivers.

Frequently Asked Questions

Listed below are frequently asked question about licensing, installation, and other administrative issues.

Will a temporary license expire if the computer is offline?

Yes.

What happens if the hard disk on the software license host computer crashes?

A new license is required. The lost, stolen, or damaged license policy applies.

Can localized and native English versions of Mastercam for SOLIDWORKS be used with the same software license?

Yes.

Does software licensing work with virtual servers?

Yes

Can I use one software license with multiple computers? / Is there a process for changing computers?

You cannot use one license simultaneously on multiple computers. If you would like to run on a different computer (such as your home computer), you will need to deactivate the license on the first system and activate it on the other. Mastercam for SOLIDWORKS software licenses do not currently support borrowing.

If the original computer host is lost, stolen, or damaged, the Lost, stolen or damaged license policy is applied to acquire a new license.

Can a software license be passed to a remote computer that is disconnected from a network?

No.

What happens if the server subnet is changed?

The software licenses will continue to function. You may need to re-point computers running the software licenses to the new server.

Do I need a new activation code when the next version of Mastercam for SOLIDWORKS is released?

No, a new activation code is not needed. The software license will need to be reactivated when maintenance is renewed, but the activation code remains the same.
